# ATTENTION! POWER OUTAGE!

---

Dear Students! Dear Guests!

The developments of the University of Miskolc enable the construction of several solar systems, and in the case of two dormitories, the solar panels have already been installed.

Due to service provider regulations, the so-called *backWatt protection* is required at the point of delivery of the university's electricity network. As there is only one such connection point, this will require **the entire Campus to be de-energised**.

According to the information provided by the contractor, the installation of the devices and the mandatory maintenance of the existing switching system will take a full day, which will be **on Sunday 5 May 2024**.

The E/1-E/4 dormitory buildings are expected to experience **a power outage from 8:00 a.m. on Sunday, May 5, 2024 until 8:00 p.m. on Sunday, May 5, 2024**.

Internet service (*neither wired nor Wi-Fi service will be available*), hot water service and heating service will also be interrupted during the blackout. In addition, the building access control system will not work.

Thank you for your understanding!

*Bolyai Student Hostel*
